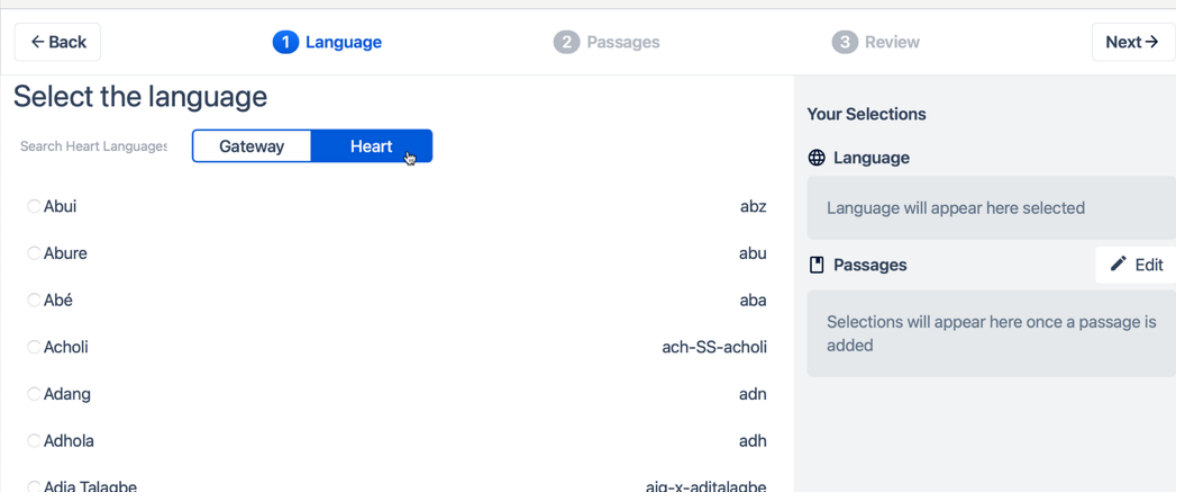
How to Create Passages File for Any Language's NT Survey RG

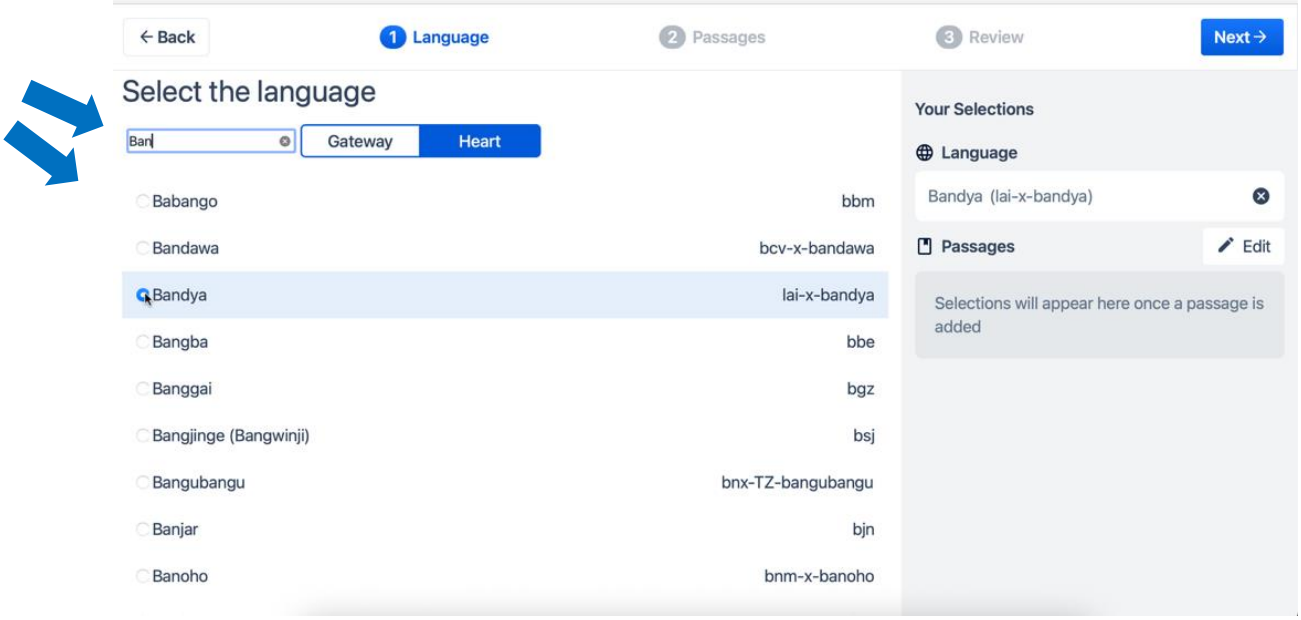
(If All NT Books Are Uploaded)

1. Go to doc.bibleineverylanguage.org/passages/language.



2. Click on "Heart" languages.

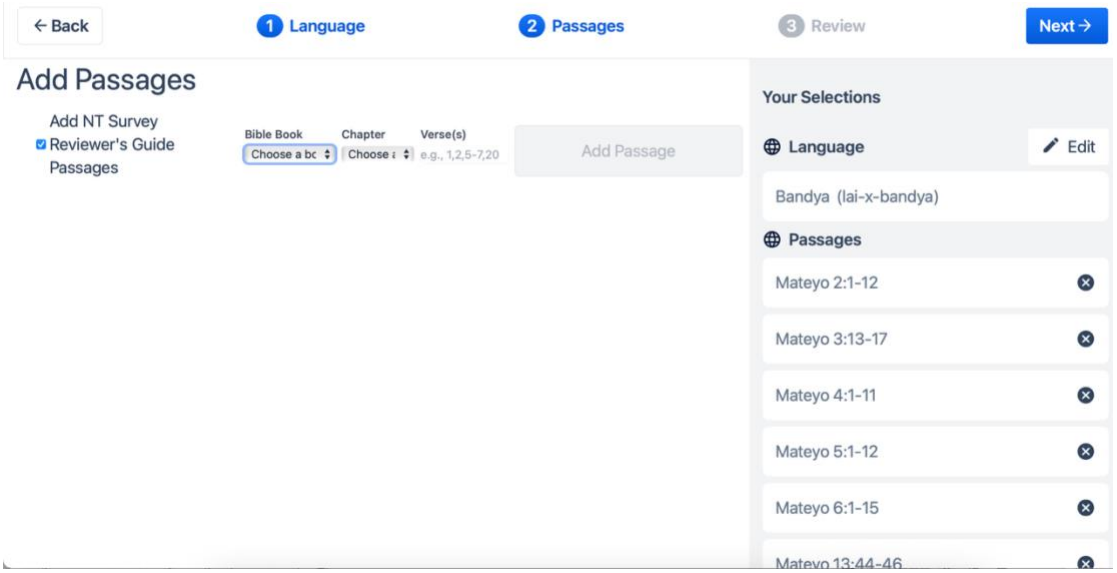
3. Start typing the language in the Search box under "Select the language." Then select the right language when it appears.



The language that you choose will show in the "Your Selections" area on the right.

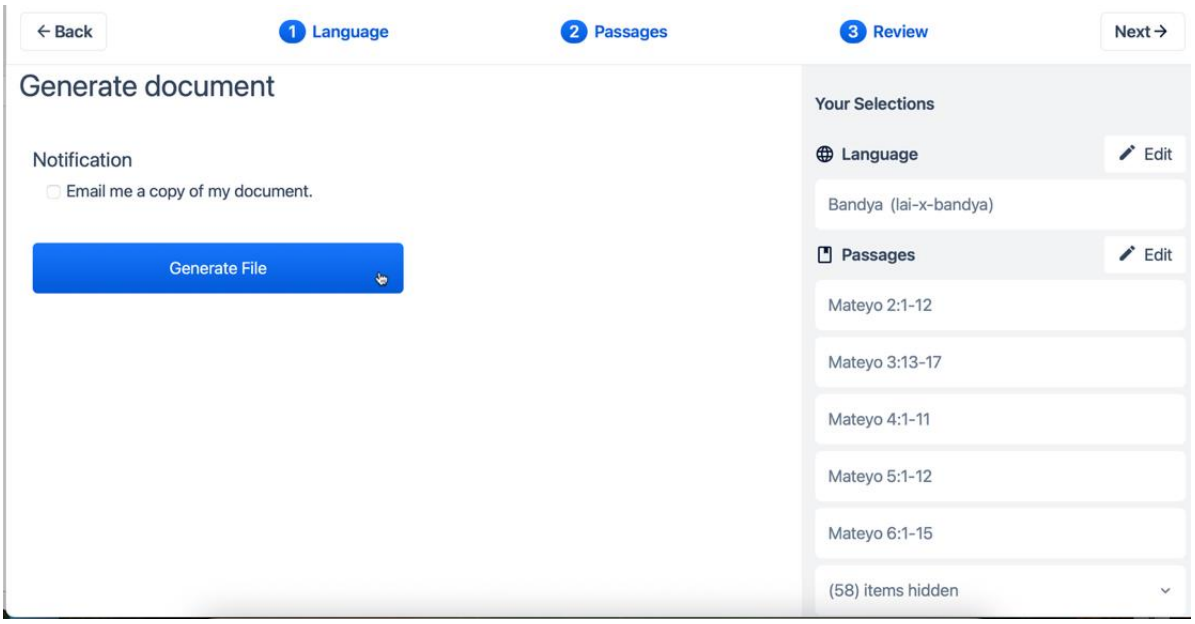
4. Then click "Next" at top right.

5. On the next screen, wait for options to appear. Then choose “Add NT Survey Reviewers’ Guide Passages” and they will all appear in the column on the right.

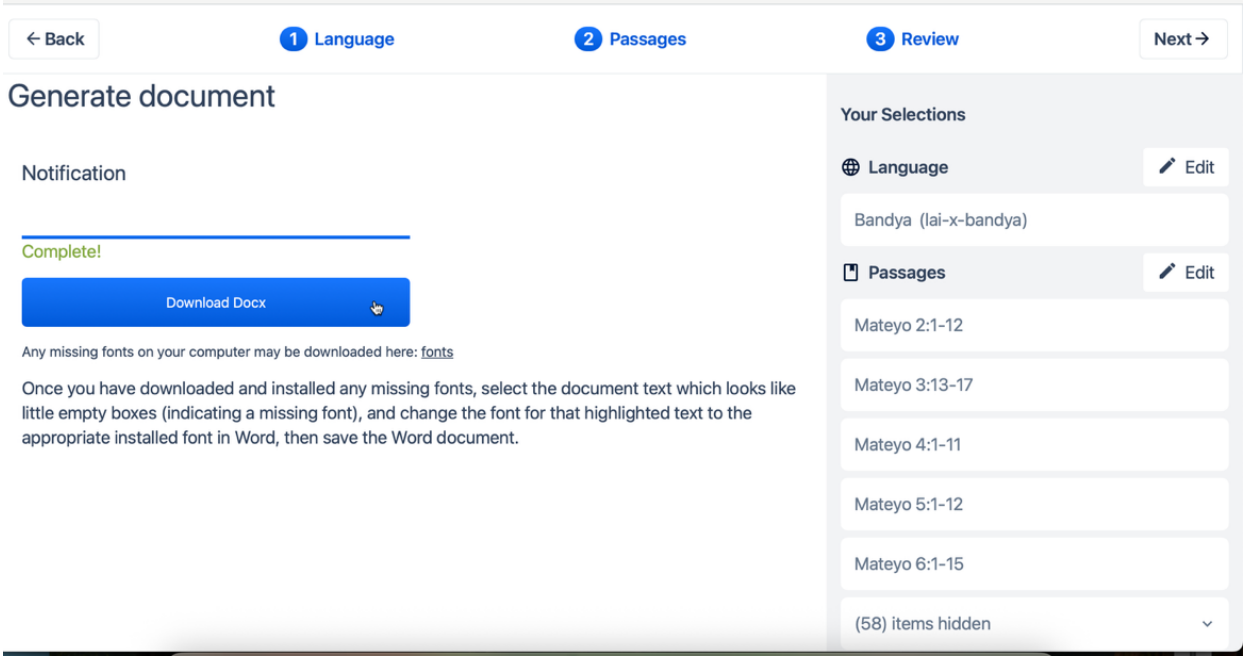


6. Click “Next” at top right.

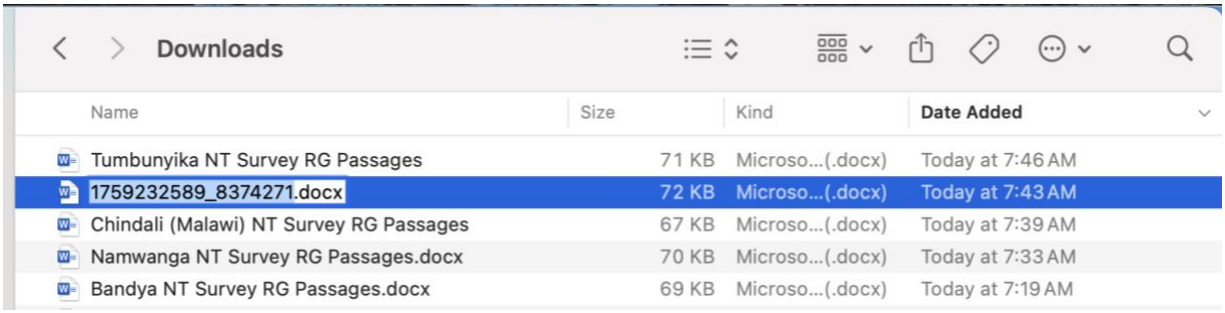
7. When “Generate File” button appears (and when it turns blue), click on it.



8. Wait until it says “Complete!” The “Download Docx” button will turn blue. Click that button.



The resulting file that downloads will have a strange numerical name, so you might want to rename it something like “Bandya NT Survey RG Passages” (if your language was Bandya).



The contents of the file will look something like what you see below. During a Reviewers' Guide session, reviewers can use this printout to follow along in the translated passage and to respond to the review leader's questions.

If the review leader chooses for the reviewers to write notes about parts of the passage, the notes can go in the blank column on the right.
